NYC Safe Browser Filtering Center!

Faster Safe Browsing for the East Coast! Augments our LA & Dallas sites.

We're proud to announce we've added a new filtering location in the Big Apple (New York City)! This will provide an even faster browsing experience for our customers closer to the U.S. East Coast! It augments our existing cloud filtering locations in Los Angeles and Dallas. To ensure you have the fastest experience, we run multiple cloud filtering centers and Safe Browser automatically uses the one closest to you!

WebProtectMe's cloud-powered filtering enables us to provide protection that's always up-to-date, and means you can centrally change filtering settings for all your devices from the web!

How to take advantage of these new features.

There's nothing you need to do! Safe Browser will automatically start using the new New York City center if it's the closest to you!
